

%문제 3번

```
applicants =[165 72 1; 172 85 0;  
             168 91 1;181 77 1;174 69 0;169 88 1];
```

```
applicants = 6×3  
    165    72     1  
    172    85     0  
    168    91     1  
    181    77     1  
    174    69     0  
    169    88     1
```

%1

```
a = applicants(:,1) >= 170;  
disp(a')
```

```
0  1  0  1  1  0
```

%2

```
b = applicants(:,2) >= 80;  
disp(b')
```

```
0  1  1  0  0  1
```

%3

```
c = applicants(:,3) == 1;  
disp(c')
```

```
1  0  1  1  0  1
```

%4

```
idx = find(a & b & c);  
disp(idx')
```

%5

```
result = applicants(idx,:);  
disp(result')
```
